

# TRACKING ON THE GO

A guide to managing your vehicles with ease

Solutions for efficiency with flexibility

**Quartix**

# Anytime. Anywhere.

Tracking your vehicles has never been easier with tools like mobile apps, geofencing, and automated reports. These technologies are changing how you can manage your team, offering you more control without needing to be at your computer. When you're working away from your desk or can't log on to the desktop system, these tools can help you keep your operations running smoothly.

# Contents

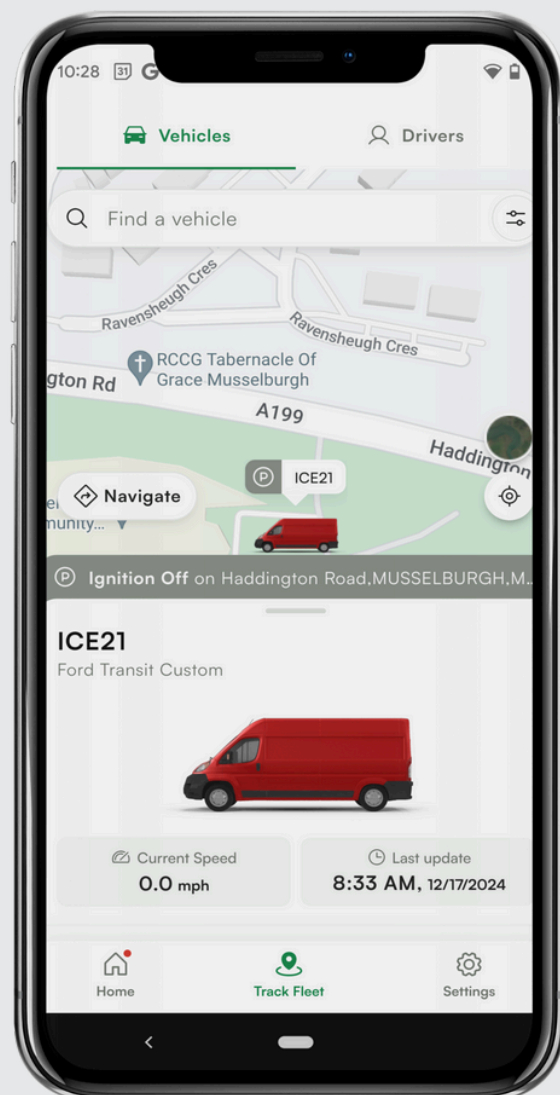

- Mobile Apps: Tracking from your phone or device
- Scheduled Reports: Get the info you need sent to your inbox
- Geofencing: Know when your vehicles cross certain boundaries

## Mobile Apps: Tracking from your phone or device

Mobile apps have improved vehicle tracking by providing constant access to your vehicles from your smartphone or tablet. You can leverage this technology in many ways, depending on the capabilities of your vehicle tracking provider's app.

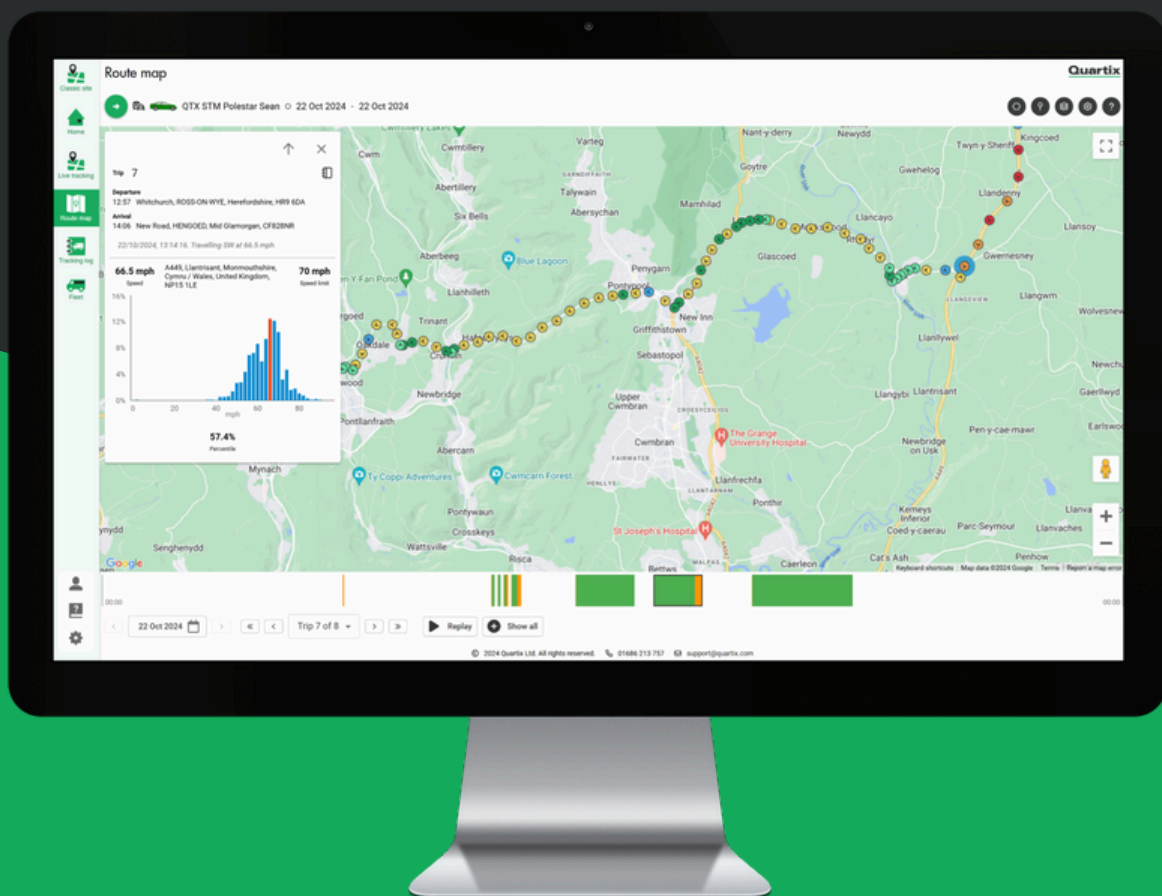

The Quartix mobile app gives you access to a live map, letting you see where each vehicle is in real time. If you want to go back to another date, you can also view each vehicle's route history.

Mobile apps can also let you track how your drivers are performing, allowing you to see things like excessive speeding or harsh braking without having to log on to a computer. If you spot any risky driving on the mobile app, you can address it right away.

Some apps, like Quartix's, even let you and your drivers mark trips as business or personal on the app itself, making record-keeping and mileage reimbursements much easier.

**"Often in the past, I would have to call or text my driver to discover his location. Now, I can simply look at the app on my phone and I know instantly where he is, which allows me to rapidly communicate an accurate delivery time to my clients."**

**- Jon Snyder, Owner, Il Laboratorio del Gelato**

**"Using the app allows me to keep up with my trucks without having to stop and set up my computer."**

**-Gard Bell, Manager, Team West Logistics**

## Scheduled Reports: Get the info you need sent to your inbox

You can keep an eye on your vehicles' activities using your vehicle tracking reports, from live tracking and out-of-hours use, to driver management. But if you are out on the road or at a job site, you might not be able to log on to your computer and pull up these reports.

Many platforms, Quartix included, allow you to set up automated or scheduled reports to get the information you need. These reports are sent directly to the email addresses of your choice either daily, weekly, or monthly, depending on your needs. This means you don't have to constantly check your tracking system to stay updated. Naming the locations your vehicles frequent with custom labels makes reading those reports even easier

**“It’s great for us, because we’ve done away with timesheets. Our employees don’t need to do the paperwork; we use the daily email reports to log their hours on site and calculate wages from that. The system definitely saves us money.”**

**– Pauline Brett, Office Manager, Ellenby Construction**

Driving style league table <small>Report period: Sat 01 September, 2018 - Sun 30 September, 2018</small>							
	Vehicle	Driving time	Distance (miles)	Speed score	Acceleration index	Braking Index	Driving style score
8	QX50 SCO - BMW 535D	22:52	826.0	0.0	76.1	42.4	38.4
7	QX61 INR - Vauxhall Astravan	23:43	673.8	15.4	44.5	66.8	41.9
6	QX10 SNW - Fiat Ducato	161:48	5977.5	50.8	28.3	44.6	62.4
5	QX11 QQE - Citroen C5	50:56	1829.1	73.7	10.5	30.5	80.1
4	SM01 QTX - Audi	90:48	3807.4	30.2	21.5	19.2	80.3
3	AE01 QTX - Volvo	51:20	1715.7	70.1	19.0	13.3	84.7
2	QX11 SIP - Renault Midlum	151:14	5368.7	82.4	3.6	8.2	94.9
1	QX10 SEB - Mercedes Atego	48:21	1662.4	87.2	1.1	3.1	98.3

These reports can include vital information like maintenance reminders, highlighting upcoming deadlines for routine servicing, so you can ensure your vehicles are always running in optimal condition.

By having these reports sent to your email, you save time and always know what’s going on with your vehicles, even when you’re busy.

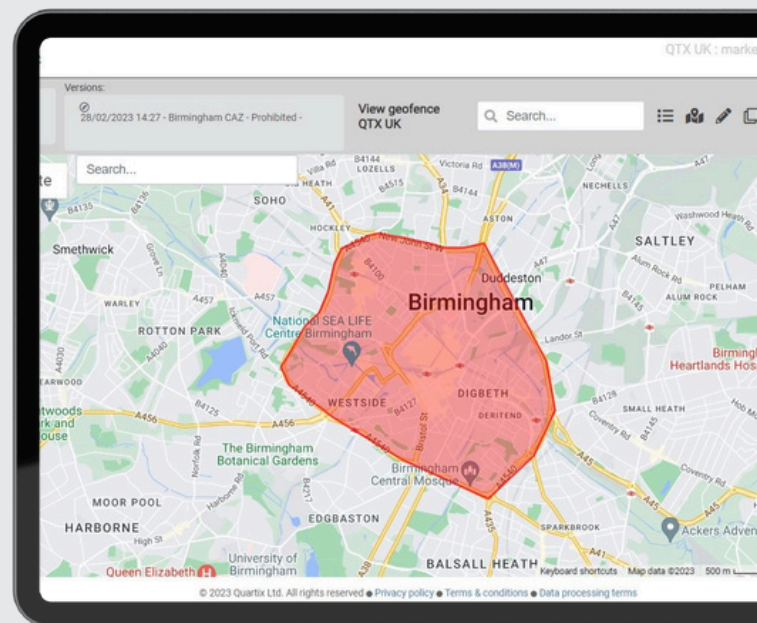

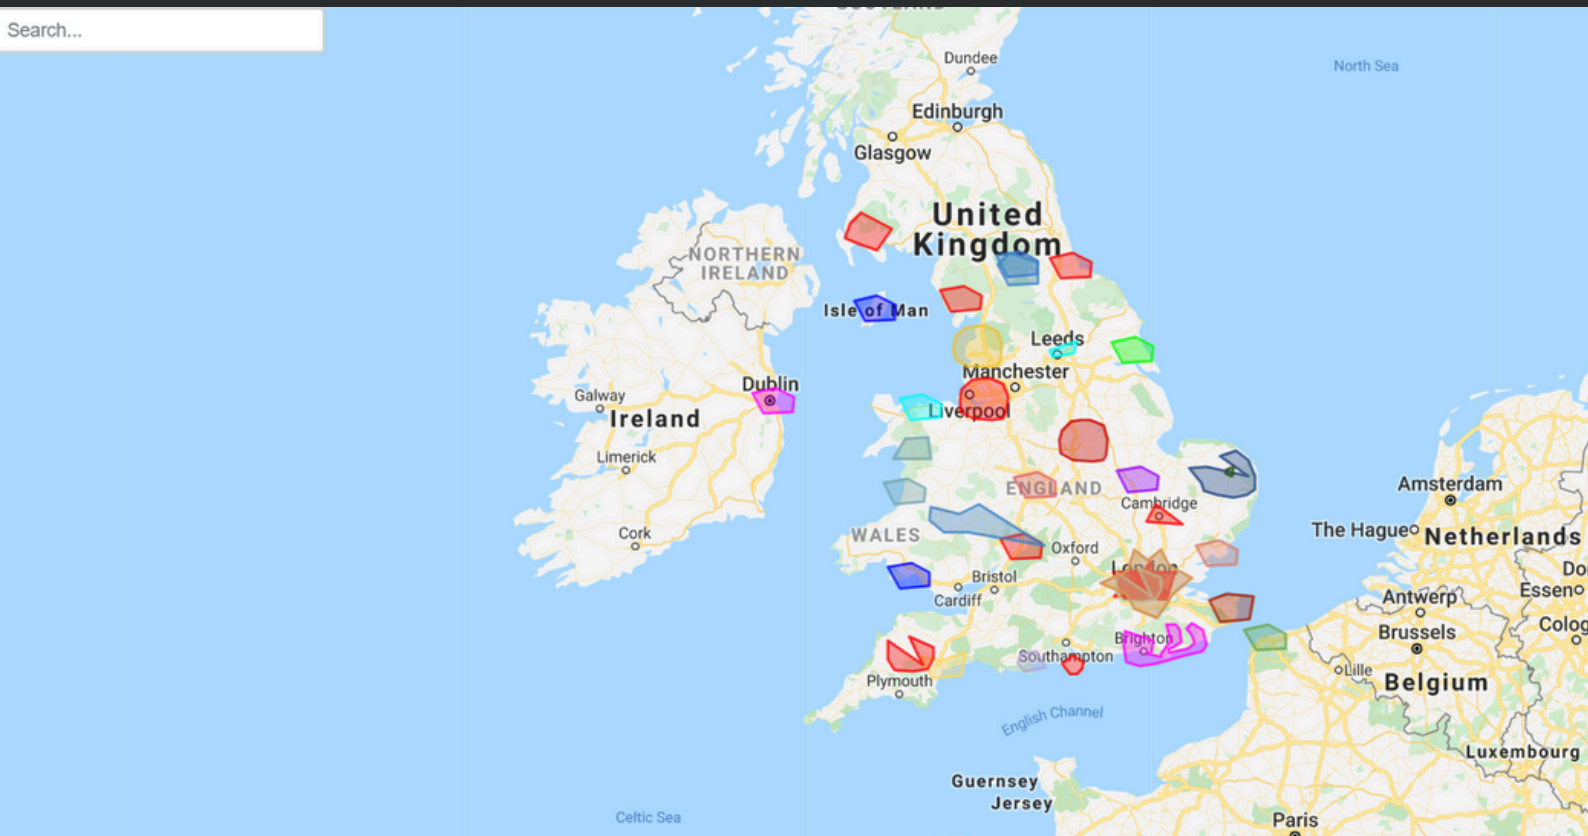

# Geofencing: Know when your vehicles cross certain boundaries

Geofencing is a useful tool that lets you set up virtual boundaries around specific areas and designate those areas as prohibited or mandatory at times of your choosing.

For example, you could draw a geofence around your company's office and establish it as a mandatory zone outside of work hours. This means that if your vehicles aren't in that area after hours or if they are moved outside of office hours, you will be notified right away.

There's no need to log on to check if your vehicles have violated any of your established location rules as these alerts can be sent to your email or even set up to come through as an SMS message.

“With the London Congestion Charge and the Dartford Crossing, we use Quartix so we do not miss any payments and receive a fine.”

– Scott Logan, Transport Manager, W J Roadmarkings

“One feature that really stands out is geofencing. We use this so we can be alerted when the crew is not where they are supposed to be.”

- Tina Kaiser, Office Manager, Meadow Services

These tools make it easy to manage your vehicles from anywhere, giving you the flexibility to run your business and track your vehicles without being tied to your computer. By using mobile apps, scheduled reports, and geofencing, you can move from simply reacting to problems to proactively managing your mobile team, no matter its size.
